Machines in Motion Inc. Internet only monthly bonus offer

February 2007 Internet only monthly bonus offer

Machines in Motion Inc. is going to pay up to \$500.00 of any control software option purchased with your new Atrump milling machine. Remember, Atrump CNC milling machines already come with the optional feature "laser Compensation" and they have generated and installed the correction tables as part of their [ISO 9001 quality assurance program](#). Machines in Motion is offering an additional FIVE HUNDRED DOLLARS that can be used towards the purchase of Centroid control software options. For example: If you want to have compression tapping cycles (normally \$350.00) you pay nothing extra. On the other hand, if you need to run very large G-code files your machine will need the optional unlock for Unlimited Part Program Size. This retails for \$1,495.00 and your cost under this monthly special offer would be only \$995.00. However if you wanted both options your cost would be $1,495.00 + 350.00 = 1,845.00$ Subtract your \$500.00 discount for a total cost of only 1,345.00

Every quotation includes a listing of optional control features. Just click on the photo of any machine you are interested in knowing more about.

This offer is good on all orders received on or before the last day of February. Don't miss out! [Print this coupon](#) and bring it with you when you visit our machinery warehouse / showroom in Pomona California.

This discount is offered by Machines in Motion Inc. and is found only on our internet web site. Contact Doug Laursen for an appointment to visit the Atrump U.S. import warehouse in Pomona, CA (714)528-7061 Office 8:00am to 5:00pm Pacific standard time.
